

Test ID	Requirement / Intention (from Phase 1)	Observed Failure (Phase 3)	Root Cause	Fix Applied	Re-test Result
TC-05	Transaction Before Login	ERROR: No active session printed twice	EOF handling printed session messages in addition to transaction handler	Removed duplicate Session ended / error printing in run()	PASS
TC-09	Transaction After Logout	Duplicate session error printed	Same EOF handling issue as TC-05	Same fix as TC-05	PASS
TC-12	Transfer – Valid Amount	ERROR: Account not found instead of transfer acceptance	Code resolved accounts only by account number, not owner name	Added getByOwner() lookup	PASS
TC-13	Transfer – Invalid Target	Generic Account not found instead of destination-specific error	Validation order incorrect	Checked destination existence separately	PASS
TC-14	Transfer – Insufficient Funds	Session limit error instead of insufficient funds	Validation precedence incorrect	Checked funds before session limit	PASS
TC-15	Transfer – Wrong Source	Account not found instead of ownership error	Ownership check occurred too late	Ownership validated after resolving account	PASS
TC-18	Withdrawal – Valid	Missing Withdrawal accepted	Withdrawal input parsing incorrect	Fixed parsing logic for owner vs amount	PASS
TC-19	Withdrawal – Insufficient Funds	Missing insufficient funds error	Validation order incorrect	Funds check moved earlier	PASS
TC-20	Withdrawal – Invalid Amount	Missing invalid amount error	Amount validation unreachable	Fixed parsing and validation flow	PASS

TC-21	Withdrawal – Wrong Account	Ownership error not printed	Ownership check skipped	Explicit ownership validation added	PASS
TC-22	Withdrawal – Session Limit	Insufficient funds shown instead of limit error	Validation precedence incorrect	Session cap checked before funds	PASS
TC-23	Deposit – Valid	Deposit accepted but logout messages missing	Early return prevented logout handling	Ensured logout always prints required lines	PASS
TC-25	Deposit – Immediate Use	Insufficient funds instead of same-session restriction	Pending deposits not tracked	Tracked pending deposits in session context	PASS
TC-26	Deposit – Invalid Amount	Logout lines missing	Logout handler incomplete	Centralized logout logic	PASS
TC-27	Paybill – Valid Company	Invalid payee error printed	Payee validation too strict	Fixed payee validation	PASS
TC-28	Paybill – Invalid Company	Logout messages missing	Same logout issue	Fixed in handleLogout()	PASS
TC-29	Paybill – Insufficient Funds	Invalid payee shown instead	Validation order incorrect	Funds checked before payee	PASS
TC-30	Paybill – Invalid Amount	Invalid payee shown	Amount validation unreachable	Reordered validation logic	PASS
TC-31	Paybill – Session Limit	Invalid payee shown	Session cap checked too late	Fixed validation precedence	PASS
TC-36	Create – Not Usable Same Session	Created account usable immediately	Same-session restriction not enforced	Tracked created accounts in session	PASS
TC-37	Delete – Valid	Account not found	Delete resolved only by account number	Allowed delete by owner name	PASS

TC-39	Delete – No Further Use	Missing expected error	Account existence logic incorrect	Fixed account existence validation	PASS
TC-40	Disable – Valid	Account not found	Disable resolved only by account number	Allowed disable by owner name	PASS
TC-42	Disable – No Further Use	Withdrawal accepted instead of disabled error	Tests are independent; disabled state not persisted across runs	Left unchanged (by design)	FAIL (expected)
TC-43	Changeplan – Valid	Account not found	Changeplan resolved only by account number	Added owner-based lookup	PASS
TC-44	Changeplan – Invalid Account	Logout lines missing	Logout logic incomplete	Fixed logout handling	PASS
